The Time Travellers Guild

A non-linear linked catalogue of the public YouTube and SoundCloud archive

Corrected linked edition. The SoundCloud section below uses the actual Time Travellers Guild account, not Procrastinatrix.

This is a field map, not a tidy discography. The archive behaves like temporal archaeology: channels, playlists, fragments, launch objects, water-works, build-days, friends, myths, private gaps and public portals. Clickable titles open the public sources.

Prepared May 2026

Gateways

The public mouth of the Guild is split between moving image and sound. YouTube carries the ritual/public body. SoundCloud carries the earlier audio body under the actual Time Travellers Guild name.

YouTube channel - The Time Travellers Guild - @thetimetravellersguild
The visible video portal: uploads, shorts, live remnants, created playlists and public Guild-facing material.

YouTube playlists page - channel shelf
The channel shelf where created playlists appear, including Dolphin, Strength, WizardSchool, Supermix and other playlist nodes.

SoundCloud profile - Time Travellers Guild - actual TTG account
The actual Guild SoundCloud account: Toby Why / London, with tracks from 2015, 2017 and 2022 visible in the public index.

SoundCloud playlists page - sets
The SoundCloud playlist shelf for the Guild account.

How to read it

Start anywhere. The structure is not chronological; it is orbital. A playlist can be a place, a ritual, a person, a build day, a listening mood, a spell, a receipt, or a trace of a private chamber whose public doorway remains.

YouTube: channel playlist nodes

These are individually linked playlists surfaced from the public YouTube archive around the Guild channel. They are arranged by charge rather than by date.

Dolphin - 4 videos indexed
Water intelligence, dream-swim, mapping, visiting. A soft-animal entry point into the archive.

Oledd - 6 videos indexed
The northern/older signal: Hen Ogledd beside Guild material, including Relative Dimension in Space.

Thorny - 4 videos indexed
Difficulty as instrument: listening, build-days, Relative Dimension, the burrs and hooks of practice.

Nicusor FLOW - 21 videos indexed
Movement, body, party, flow and build-day energy: a social/kinetic branch.

Wedding Belles 4 Rose - 5 videos indexed
Ceremony branch: rose, bells, family, romantic/comedic ritual objects.

Scores - 21 videos indexed
Soundtrack spine and working music. A useful node for ffilm, sound design, and Guild atmosphere.

.:. Hedgemoney Wells and The Time Travel Uprising - playlist
Story-political branch: transtemporal detective energy, invisible graffiti, uprising as archive logic.

Unresolved but visible on the channel shelf

The public channel shelf also surfaces playlist names such as Strength, WizardSchool, Supermix and Dr Who.;.EverWhen Pilot. I have not included them as individual rows here because I only linked playlist URLs I could resolve directly in this pass. They remain marked for the next excavation.

YouTube: connected Guild / Toby playlist nodes

These playlists sit around the Guild rather than only inside the present channel shelf. They are part of the visible public archaeology because search indexes them with Toby Godden, Kelfin Oberon, EverWhen, Trailhead and Guild material.

United Nations Intelligence Taskforce - older office
Older civic-myth office: theme tune, Guild gathering at The Dot, Dig.it, hologram persona, Gentlemen, The King.

Trailhead.. - launch trail
Launch branch: LIVE LAUNCH, EverWhen, timemachine44 and visible private gaps. A doorway with sealed rooms beside it.

EverWhen - 12 videos indexed
Diary-portal branch: Doctor Who contact, midweek vlog reality, Oliverse-adjacent continuity.

Taran - 11 videos indexed
Friend/collaborator branch: EverWhen Intro, Earth News, Dig.it and One Word. Relational archive rather than brand surface.

Reading route

For a fast public route through the older visual mythology: United Nations Intelligence Taskforce -> Trailhead.. -> EverWhen -> Taran. That line moves from office to launch to diary to friend-archive.

SoundCloud: the actual Time Travellers Guild account

This is the corrected audio branch. The account is public as Time Travellers Guild, associated with Toby Why and London. It contains one visible playlist node plus loose tracks that function like shards, scenes and artefacts.

Waveforms - Electronic / 2017
The core SoundCloud playlist node. Contains Pixeldust, The Appleseed Press, By Arrangement, Pixeldust Entropy and One Non-Existant Thursday.

Loose SoundCloud shards

The SoundCloud profile page exposes these as individual tracks rather than as a tidy album structure. They read best as audio field notes.

The Jigsaw - Episode One AUDIO - 2022
Conversation genre; audio for a film-linked object. A spoken/assembled shard from 2022.

Thumb. - 2022
Ambient; described publicly as a precursor to DIGIT, made with PUSH2 and Moog Minitaur.

Knockwater Bridge - 2017
Electronic; bridge/water-place audio, sitting naturally beside the Honddu/Brecon river-field material.

Underwater Railway - 2017
Ambient; a submerged transport image. Very Guild: infrastructure under water, movement under memory.

Wellington Jones - 2017
Drum & Bass; named-character energy, city/countryside crossover in the public comments.

One Non-Existant Thursday - 2017
Electronic; a calendar error with chimes. The most directly chronogamic title in the branch.

Pixeldust Entropy - 2017
Ambient; further iterations, decay and pattern residue.

Pixeldust - 2017
Classical-tagged; mellow, peaceful, particulate. A small sonic cloud.

The Appleseed Press - 2017
Electronic; print/publishing/object-memory branch. The title already sounds like a Guild imprint.

By Arrangement - 2017
A formal title with ritual/compositional charge: things placed, agreed, staged.

Gaz Lightyear and the Time Travelling Harp - 2015
Duet for harp, Triangla, sampler and voice. Early Guild sound-object, 2015.

Non-linear listening routes

Use these as ways through the archive rather than as fixed interpretation.

The Doorway Route

YouTube channel -> Trailhead.. -> EverWhen -> The Jigsaw. Use when you want launch, diary, film-audio and the sense of entering a continuity.

The Water Route

Dolphin -> Underwater Railway -> Knockwater Bridge -> Waveforms. Use when the Guild becomes liquid, submerged, mammalian, railway-like and river-fed.

The Office Route

United Nations Intelligence Taskforce -> Scores -> Gentlemen, The King / related videos. Use when the Guild becomes civic, Welsh, institutional, absurdly serious.

The Build-Day Route

Nicusor FLOW -> Thorny -> Scores -> Thumb. Use when the archive is not memory but production: flow, difficulty, soundtrack, interface, Ableton/PUSH/Moog logic.

The Relational Route

Taran -> Wedding Belles 4 Rose -> Oledd -> SoundCloud loose shards. Use when the thread is people, friendship, ceremony, older northern signal and fragments left warm.

Coherent map

The YouTube archive is the public ritual body: launches, playlists, field reports, meetings, ceremonies, jokes, friends, vlogs, visual proof, and created myth. The SoundCloud archive is the older audio body: waveforms, bridges, railways, print-imprints, calendar errors, harp/Triangla/sampler voice and other sonic objects. Together they are not a brand history so much as a living set of portals.

Temporal archaeology means the gaps matter too. Private videos, unresolved playlist shelves, old comments, changed names and external echoes are not failures of the archive. They are the archive behaving like time.

Verification notes

This document is based on public web search/open results available during this pass. The links are intentionally direct and clickable. Where a playlist name appeared in the channel shelf but a direct playlist URL could not be resolved, it has been named as unresolved rather than guessed.
